# PR01

Summary:

The purpose of this project is to exercise forms that are used on web applications. Students will exercise implementing form controls like radio buttons, textboxes, and date pickers using Bootstrap 3.0.

Requirements:

All of the detail use cases for this project are located on the apollo submission slab under the 'use case' button. The applications will be tested on chrome only and no other browsers.

Preview:

Here is a preview of how the app should look like.

Deadline:

The deadline is found under the 'end' attribute displayed on the header of the submission slab for 'pr01'. The project will be built on a codepen.io fiddle. When it is complete, paste your link on the submission slab of apollo and hit submit.
